EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, Go, Rust, Solidity, Ruby
- **Web**: Ruby on Rails, REST APIs, Full-Stack Web Development
- **AI**: Large Language Models (LLMs), Generative AI, AI Agents, Automation Workflows, Prompt Engineering, Deep Learning, Model Evaluation, Vibe Coding, Claude Code, Codex
- **Data**: SQL, Data Modeling, ETL Pipelines, Data Transformation, Data Validation, Cloud Deployment
- **DevOps**: Terminal/Command Line, Git, Docker, CI/CD
- **Integration**: Platform Integrations, System Automations, Workflow Orchestration
- **Methodologies**: Agile Development, SDLC, Rapid Prototyping, Self-Starter, Problem Solving, Analytical Reasoning

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines handling 50,000+ daily records, redesigned queues, improving reliability by 30%.
- Engineered SQL schemas and indexing strategies, reducing query latency and enhancing backend system performance.
- Developed auto mated validation scripts ensuring data integrity and correctness across all processing workflows.
- Collaborated with cross-functional teams to deploy scalable, cloud-ready solutions aligned with SDLC and Agile practices.
- Implemented logging and Docker CI/CD pipelines, ensuring stable production deployments and system monitoring.
- Applied Vibe Coding and multi-model judgment (Opus/Sonnet) to deliver AI-driven solutions rapidly with high accuracy.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable backend recommender system using Python, SQL, and REST APIs for personalized product recommendations.
- Integrated LLMs and Vibe Coding to rapidly prototype automated recommendation workflows, increasing deployment speed.
- Implemented Docker-based CI/CD pipelines improving response times, deployment efficiency, and reliability in production.
- Designed modular API testing scripts and validation checks for consistent and reliable production releases.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC with responsive SCSS UI.
- Implemented dynamic CRUD operations, authentication, caching mechanisms, and database validation processes.
- Optimized query performance and improved maintainability through structured testing and modular code practices.
- Ensured scalability, accessibility compliance, and clean, modular architecture across the application.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based backend analytics platform generating automated financial insights and reports daily.
- Built ETL workflows using Python and SQL with Claude Code, automating processes and accelerating deployment.
- Implemented REST API automation testing and data validation strategies to ensure accurate results.
- Integrated CI/CD pipelines with Docker, improving response time and system availability significantly.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based ensemble deep learning pipeline achieving high accuracy for driver fatigue detection.
- Improved preprocessing efficiency using optimized feature extraction techniques, reducing computation time by 20%.
- Applied experimentation and hyperparameter tuning with reproducible validation for consistent high-performance AI models.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including loops, functions, control flow, and object-oriented programming concepts.
- Applied machine learning algorithms, feature engineering techniques, and model evaluation on real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and foundational principles of Large Language Models.
- Built practical generative AI applications for text generation, summarization, and intelligent automation workflows.
