EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science & Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, JavaScript, TypeScript, Ruby on Rails, Node.js, REST APIs, Full-Stack Web Development, Frontend Frameworks (React, SCSS)
- **AI/ML**: Generative AI, Large Language Models (LLMs), AI-Assisted Coding, NLP (Hugging Face Transformers, spaCy)
- **Data**: SQL, ETL Workflows, Data Cleaning, Feature Engineering, Large Dataset Handling
- **Cloud**: AWS SageMaker, Google Vertex AI, Azure AI, Cloud-Ready Solutions, Scalable & Maintainable Systems
- **Deployment**: Docker, CI/CD Pipelines, SDLC, DevOps Practices
- **Collaboration**: Agile Methodology, Cross-Functional Teamwork, Problem-Solving Mindset, Ownership-Driven Development, Technical Documentation
- **Debugging**: Performance Optimization, Code Refactoring, Issue Resolution
- **Experimentation**: Rapid Prototyping, Learning Through Feedback, Iterative Development

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python pipelines processing 50,000+ daily records, implementing scalable solutions, improving reliability by 30%.
- Engineered SQL schemas and indexing strategies, reducing query latency and enhancing backend performance.
- Developed automated validation scripts ensuring data integrity and technical documentation across all workflows.
- Collaborated with cross-functional teams to deploy scalable, cloud-ready solutions using SDLC and DevOps.
- Implemented structured logging and Docker-based CI/CD pipelines to ensure stable production deployments.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable backend recommender system using Python, SQL, and REST APIs for personalized product recommendations.
- Integrated Large Language Models (LLMs) and AI-assisted coding tools to improve recommendation accuracy.
- Implemented Docker-based CI/CD pipelines improving response times, deployment efficiency, and reliability in production.
- Designed modular API testing scripts with iterative development and validation checks for consistent production releases.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC with responsive SCSS UI.
- Implemented dynamic CRUD operations, authentication, caching mechanisms, and database validation processes.
- Optimized query performance and maintainability through structured testing, modular code, and scalable systems.
- Ensured accessibility compliance and clean, maintainable architecture across the frontend and backend systems.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based backend analytics platform generating automated financial insights and reports daily.
- Built structured ETL workflows using Python and SQL to process and validate large datasets efficiently.
- Implemented REST API automation, debugging, and performance optimization strategies to ensure accurate results.
- Integrated Docker-based CI/CD pipelines with cloud deployment, improving response time and system reliability.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based ensemble deep learning pipeline achieving high accuracy for driver fatigue detection.
- Improved preprocessing efficiency using optimized feature extraction techniques, reducing computation time by 20%.
- Performed hyperparameter tuning and reproducible experiments to ensure consistent model performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including loops, functions, control flow, and object-oriented programming concepts.
- Applied machine learning algorithms, feature engineering techniques, and model evaluation on real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and foundational principles of Large Language Models.
- Built practical generative AI applications for text generation, summarization, and intelligent automation workflows.
