EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, SQL
- **AI**: Artificial Intelligence (AI), Machine Learning, Deep Learning, Generative AI, Agentic AI Systems
- **Deep Learning**: CNN, RNN, LSTM, Transformers
- **NLP**: NLP, Text Processing, Semantic Analysis
- **Computer Vision**: Image Processing, Visual Feature Extraction
- **AI Frameworks**: PyTorch, Large Language Models (LLMs), Generative AI Tools, Transformer Models
- **Data Engineering**: Data Pipelines, ETL Workflows, Data Collection, Data Cleaning, Data Preprocessing, Data Transformation
- **API Development**: REST APIs, FastAPI
- **Databases** SQL Databases, Relational Databases
- **DevOps**: Docker, CI/CD Pipelines, Git Version Control
- **Development**: Object-Oriented Programming (OOP), Agile, Software Development Life Cycle (SDLC)
- **Collaboration**: Cross-Functional Collaboration, Problem Solving, Technical Documentation, Communication

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python and SQL ETL pipelines processing 50,000+ daily records, improving dataset reliability significantly.
- Engineered scalable relational SQL schemas and indexing strategies reducing query latency accelerating analytics.
- Developed automated data validation, collection, preprocessing workflows ensuring structured datasets for deep learning.
- Collaborated with cross-functional teams using Agile SDLC delivering scalable machine learning pipelines.
- Implemented Docker, Git, and CI/CD automation enabling reliable deployment of cloud-ready data engineering systems.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed Generative AI recommender backend using Python, SQL, REST APIs enabling personalized recommendations.
- Integrated transformer-based Large Language Models with retrieval augmented generation pipelines improving NLP.
- Designed scalable deep learning pipelines supporting NLP inference workloads and generative AI models services.
- Implemented Docker CI/CD automation and API validation testing ensuring stable deployment and monitoring of AI services.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management platform using Ruby on Rails MVC architecture and responsive frontend components.
- Implemented secure CRUD APIs, authentication workflows, relational SQL schemas supporting scalable applications.
- Optimized SQL queries through indexing strategies improving backend performance and reducing database response latency.
- Ensured maintainable architecture using modular coding, Git version control, and Agile development collaboration workflows.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-ready analytics platform generating automated financial insights using Python pipelines and ETL workflows.
- Built scalable ETL pipelines using Python and SQL to preprocess large datasets for machine learning pipelines.
- Implemented REST API automation testing and validation ensuring reliable data ingestion and analytics output accuracy.
- Integrated Docker containerization and CI/CD pipelines improving system scalability, deployment efficiency significantly.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based ensemble deep learning pipeline leveraging neural network architectures for fatigue detection.
- Optimized preprocessing and feature extraction workflows reducing inference latency by 20% improving model evaluation.
- Applied experimentation, hyperparameter tuning, reproducible pipelines ensuring consistent deep learning performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including control flow, functions, data structures, object-oriented programming principles.
- Applied machine learning algorithms, feature engineering techniques, model evaluation metrics across real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures, prompt engineering techniques, principles behind modern Large Language Models.
- Built practical generative AI applications including summarization, semantic search, and intelligent automation workflows.
