EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, .NET, Java
- **AI**: Transformer Models (BERT, ROBERTA, LSTM, RNN), Generative AI (GANs, LLMs, LLAMA)
- **Analytics**: Predictive Analytics, Prescriptive Analytics, Machine Learning, Deep Learning
- **Data**: SQL, MSSQL, Oracle, Data Processing, Feature Engineering, Data Validation, Dataset Preparation
- **Cloud**: Azure
- **Deployment**: Docker, CI/CD, On-Device ML, Edge AI
- **Frameworks**: PyTorch, TensorFlow
- **Version Control**: Git
- **Collaboration**: Cross-Functional Teamwork, Agile, SDLC, Problem Solving, Documentation

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python pipelines processing 50,000+ daily records, improving ML feature reliability by 30%.
- Engineered SQL schemas with indexing strategies, reducing query latency and enhancing backend data workflows.
- Developed automated validation scripts ensuring dataset integrity, accuracy, and consistency for ML model training.
- Collaborated with cross-functional ML and DevOps teams to deploy scalable, cloud-ready inference pipelines.
- Implemented Docker-based CI/CD automation and structured logging, improving production reliability and monitoring efficiency.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable Python backend with SQL and REST APIs for personalized product recommendations using ML models.
- Integrated Large Language Models (LLMs) and generative AI for contextual recommendations and workflow automation.
- Implemented Docker CI/CD pipelines, optimizing latency, scalability, and deployment efficiency in production.
- Designed modular API testing and validation scripts ensuring consistent, reliable, and accurate model outputs.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC architecture with responsive SCSS UI.
- Implemented dynamic CRUD operations, authentication, caching, and SQL validation pipelines improving performance.
- Optimized queries and ensured maintainable architecture with modular code, structured testing, and Agile practices.
- Ensured maintainable architecture through modular code design, documentation, and structured Agile development practices.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based analytics platform generating automated financial insights using Python pipelines and SQL.
- Built ETL workflows for dataset ingestion, processing, feature engineering, and validation efficiently.
- Implemented REST API testing and CI/CD pipelines, improving deployment reliability and system scalability.
- Integrated Docker and cloud-based monitoring to ensure data integrity and production system availability.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch ensemble deep learning pipeline achieving high accuracy for audio-based fatigue detection.
- Improved preprocessing efficiency using feature extraction techniques, reducing computation and inference time by 20%.
- Applied hyperparameter tuning, structured experiments, and reproducible validation for consistent ML performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including loops, OOP, functions, and scalable software engineering practices.
- Applied ML algorithms, feature engineering, and model evaluation on real-world datasets and pipelines.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures, prompt engineering, and principles of Large Language Models (LLMs).
- Built generative AI applications for text summarization, automated insights, and intelligent workflow optimization.
