EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python (Data Ingestion, Automation, Scripting), SQL (Query Optimization, Data Modeling)
- **Data**: Data Pipelines, ETL Pipelines, Data Ingestion, Data Cleaning, Data Transformation, Feature Engineering
- **AI/ML**: Large Language Models (LLMs), Prompt Engineering, NLP, Machine Learning Fundamentals, Agentic AI, AI Automation
- **Microsoft**: Microsoft Fabric (Lakehouse, Data Pipelines, Notebooks), Power BI (Dashboarding, Data Visualization), Copilot Concepts
- **Integration**: REST APIs, API Integration, Cloud Integration
- **Tools**: Git, GitHub
- **Concepts**: Data Modeling, Experimentation, Debugging, Performance Optimization
- **Soft Skills**: Analytical Thinking, Problem Solving, Collaboration, Communication, Documentation, Continuous Learning, Experimentation

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python data pipelines handling 50,000+ records in Microsoft Fabric, improving automation workflows by 35%.
- Engineered SQL queries and indexing strategies, reducing latency by 40% and enhancing data modeling performance.
- Developed REST APIs integrating cloud services and data pipelines, enabling scalable automation and workflows.
- Collaborated using Git workflows and documentation, improving CI/CD reliability for AI and BI teams.
- Implemented Docker-based automation pipelines, ensuring stable deployments, scalability, and efficient troubleshooting.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built Python recommender system with SQL, REST APIs, and data pipelines for personalized recommendations.
- Integrated Large Language Models (LLMs) for business analytics, automation workflows, and semantic recommendations.
- Developed agentic AI workflows enabling intelligent recommendations, semantic automation, and enhanced decision-making.
- Implemented Docker and Git CI/CD pipelines, improving deployment efficiency, scalability, and reliability.

Rails TODO App | LINK — **September 24- November 2024**

- Developed MVC-based application with REST APIs, enabling scalable backend workflows and structured data handling.
- Implemented CRUD operations, authentication, and SQL optimizations, improving database performance and workflows.
- Applied testing, debugging, and CI/CD practices, ensuring reliable and maintainable software deployments.
- Ensured modular architecture and API integration, improving scalability, code quality, and system reliability across workflows.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed PyTorch-based NLP pipeline with feature engineering, improving model accuracy and scalability.
- Built ETL pipelines with SQL and data cleaning techniques, ensuring accurate and efficient data transformation processes.
- Integrated REST APIs and cloud services, enabling scalable data workflows and seamless API-based system communication.
- Implemented Docker CI/CD automation, improving deployment speed, system availability, and reliability by 25% in production.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based NLP pipeline with feature engineering, improving model accuracy and scalability.
- Reduced preprocessing time by 20% using optimized data pipelines, improving large-scale workflow efficiency.
- Applied experimentation, validation, and documentation to ensure reproducible and consistent machine learning workflows.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Applied Python for data ingestion, cleaning, feature engineering, and building scalable machine learning workflows.
- Implemented machine learning models, validation, and data processing pipelines aligned with AI-driven optimization.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned Large Language Models, prompt engineering, and NLP concepts for building intelligent AI automation systems.
- Developed LLM-based applications enabling agentic AI workflows, Copilot automation, and Power BI integration.
