EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python (data manipulation, automation, scripting), SQL (query optimization, data modeling)
- **Machine Learning**: NLP, Large Language Models (LLMs), Transformers (BERT), Regression, Clustering, Neural Networks, Feature Engineering, Model Evaluation, Hyperparameter Tuning
- **Data**: ETL Pipelines, Data Cleaning, Data Normalization, Data Transformation, Scalable Data Workflows, Structured Logging
- **Document Intelligence**: OCR, Document Parsing (PDF/Scanned), Entity Extraction, Signature Detection
- **Search**: Text Search, Elasticsearch, Solr, Vector Search
- **Deployment**: Docker, CI/CD, Cloud Integration, Automation Pipelines
- **Tools**: Git, GitHub
- **Soft Skills**: Analytical Thinking, Problem Solving, Collaboration, Communication, Documentation, Continuous Learning

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines processing 50,000+ records, improving workflow automation reliability by 35%.
- Engineered SQL schema and indexing strategies, reducing query latency by 40% and enhancing backend performance.
- Automated validation scripts ensuring data integrity, structured normalization, and correctness across all pipelines.
- Collaborated with cross-functional AI/BI teams to deploy cloud-ready, scalable solutions aligned with DevOps practices.
- Implemented Docker-based CI/CD pipelines, enhancing production deployment stability and monitoring efficiency.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable backend recommender system using Python, SQL, and REST APIs for personalized product suggestions.
- Integrated Large Language Models (LLMs) to enhance semantics, automate workflows, and improve recommendations.
- Executed Docker CI/CD pipelines, reducing deployment time and improving system reliability and response speed.
- Designed modular API validation scripts, ensuring consistent and reproducible production-ready releases across pipelines.

Rails TODO App | LINK — **September 24- November 2024**

- Created full-stack task management system using Ruby on Rails MVC with secure REST API backend.
- Implemented CRUD operations with caching, authentication, and validation, improving maintainability and system scalability.
- Optimized query performance with structured testing and modular code practices for robust backend workflows.
- Ensured accessibility compliance, modular architecture, and clean integration across APIs and frontend workflows.

Morning Market Brief | LINK — **June 24- August 2024**

- Engineered cloud-based NLP analytics platform generating automated financial insights and daily market reports.
- Built ETL pipelines using Python and SQL to clean, normalize, and validate heterogeneous datasets efficiently.
- Executed REST API automation testing and Docker-based CI/CD pipelines, improving system availability by 25%.
- Integrated feature-engineered NLP models, improving accuracy and reliability for real-time document intelligence tasks.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Implemented PyTorch-based ensemble deep learning pipeline for high-accuracy driver fatigue detection.
- Optimized feature extraction and preprocessing workflows, reducing computation time by 20% for large-scale datasets.
- Applied structured experimentation, hyperparameter tuning, and reproducible validation for consistent model performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python programming, data ingestion, cleaning, transformation, and feature engineering for scalable ML workflows.
- Applied machine learning models, validation strategies, and data pipelines on real-world datasets for optimization.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, NLP, prompt engineering, and LLM fundamentals for intelligent AI workflows.
- Built practical LLM-based applications for text understanding, summarization, and AI-driven automation processes.
