EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Java (OOP, Multithreading), Python (Scripting, Automation), Bash (Basics), SQL
- **CI/CD**: CI/CD Pipelines, Continuous Integration, Continuous Delivery, Concourse CI (Basics), Git (Version Control), Automation Workflows
- **Cloud**: Google Cloud Platform (GCP), AWS (Fundamentals), Cloud-Native Infrastructure
- **Containers**: Docker (Containerization), Kubernetes (Architecture, Deployment, Orchestration)
- **Backend**: REST APIs, Microservices Architecture, API Design
- **Infrastructure**: Distributed Systems, Infrastructure Concepts (IaC – Basics)
- **Testing**: Unit Testing (JUnit), Test-Driven Development (TDD), API Testing
- **SDLC**: Software Development Lifecycle, Agile, DevOps Practices
- **Debugging**: Troubleshooting, Root Cause Analysis, Performance Optimization
- **Tools**: GitHub, Linux (Basics)
- **Soft Skills**: Problem Solving, Cross-functional Collaboration, Communication

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines processing 50,000+ records, improving CI/CD pipeline efficiency and scalability by 35%.
- Engineered PostgreSQL indexing and SQL optimizations, reducing query latency 40% improving performance.
- Developed REST APIs and microservices aligned with SDLC, enabling Kubernetes deployment and integration.
- Collaborated with cross-functional teams using Git workflows, improving CI/CD reliability accelerating release cycles.
- Implemented Docker automation and troubleshooting workflows, ensuring stable deployments and continuous delivery.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built cloud-native system using REST APIs, SQL, microservices, improving performance scalability 30%.
- Integrated LLM-based automation workflows, enhancing decision-making and continuous delivery across distributed pipelines.
- Built CI/CD pipelines using Git-based workflows automation tools, improving Kubernetes reliability reducing releases.
- Implemented Kubernetes YAML deployments and orchestration workflows, improving scalability and reliability of applications.

Rails TODO App | LINK — **September 24- November 2024**

- Developed application using MVC architecture, implementing REST APIs and scalable microservices design principles.
- Implemented CRUD operations, authentication, caching, SQL optimization, improving performance and workflow efficiency.
- Applied testing, debugging, and CI/CD practices, ensuring maintainable, high-quality, production-ready application delivery.
- Explored open-source CI/CD tools, contributing to GitHub repositories through documentation and workflow improvements.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-native platform using Python, enabling automated data processing and real-time insights generation.
- Built ETL pipelines and REST APIs, ensuring efficient data validation integration scalability across systems.
- Implemented automated testing, debugging, and CI/CD troubleshooting workflows, improving reliability and reducing issues.
- Integrated Docker CI/CD pipelines, improving deployment speed, Kubernetes compatibility, overall system availability 25%.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based pipeline, improving model accuracy through optimized architecture and scalable data processing.
- Reduced preprocessing time by 20% using optimized pipelines, improving efficiency in large-scale data processing systems.
- Applied structured experimentation, debugging, and reproducible validation aligned with SDLC best practices.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python scripting, data processing techniques supporting automation CI/CD workflows scalable backend systems.
- Applied machine learning, feature engineering, and validation techniques aligned with data-driven system optimization.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures, prompt engineering, and scalable AI integration in cloud-native environments.
- Built generative AI applications enabling automation API-driven workflows continuous delivery across distributed systems.
