Hiring Manager
Urban Jungle
Oval, London, UK

Subject: Application for Data Scientist Position

Dear Hiring Manager,

I am excited to apply for the Data Scientist role at Urban Jungle. With my experience in **Python, SQL, machine learning, and end-to-end data pipelines**, combined with hands-on project experience in predictive modeling, generative AI, and scalable data platforms, I am confident in my ability to contribute immediately to your data-driven initiatives.

During my internship at **flickDONE**, I **optimized ETL pipelines processing 50,000+ daily records**, engineered SQL-based data models, and implemented **Docker CI/CD pipelines** for reliable model deployment. My projects, including a **Generative AI Product Recommender System** and a **cloud-based analytics platform**, demonstrate my ability to **develop predictive models, integrate Large Language Models, conduct A/B testing, and deploy production-ready solutions**. These experiences align closely with Urban Jungle's focus on **risk assessment, pricing, fraud detection, and customer-centric data products**.

I am particularly drawn to Urban Jungle's mission to make insurance fair and data-driven. I thrive in cross-functional environments and excel at translating **complex technical concepts into actionable business insights**. I am fully prepared to work remotely or relocate if required and would require work authorization (visa sponsorship) to contribute in the UK.

I am confident that my technical expertise, hands-on experience, and strong alignment with Urban Jungle's mission make me an **excellent fit for this role**. I would welcome the opportunity to contribute to your team and help drive meaningful impact for your customers and business.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience can benefit Urban Jungle.

Sincerely,
Jyothir Raghavalu Bhogi
