EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: PHP, Magento 2, Python, Object-Oriented Programming (OOP), Automation Scripting
- **Web**: HTML5, CSS3, JavaScript, REST APIs, MVC Architecture, SCSS
- **Databases**: MySQL, MariaDB, SQL Query Optimization
- **Software Development**: SDLC, Agile, Unit Testing, Test-Driven Development (TDD), CI/CD, Docker, Linux, Unix
- **Version Control**: Git, GitHub, Code Reviews, Mentoring, Cross-functional Collaboration
- **Deployment**: Docker, CI/CD Pipelines, Cloud Deployment
- **DevOps**: CI/CD Pipelines, Docker, Cloud Deployment
- **Problem-Solving**: Technical Design, Feature Estimation, Low-Latency Application Optimization, Debugging, Analytical Thinking

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines processing 50,000+ daily records, improving validation reliability by 30%.
- Engineered SQL schema and indexing strategies, reducing query latency and enhancing backend performance.
- Developed automated validation and PHP/Magento integration scripts ensuring data integrity across workflows.
- Collaborated with cross-functional teams using Git to deploy scalable, cloud-ready solutions.
- Implemented structured logging, CI/CD pipelines, and Docker deployments for reliable production monitoring.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable backend system using Python, PHP, SQL, and REST APIs for recommendations.
- Integrated LLMs to enhance automation, contextual intelligence, and recommendation accuracy metrics.
- Implemented Docker CI/CD pipelines with PHPUnit testing to improve deployment efficiency and reliability.
- Designed modular API testing scripts and validation checks for consistent, low-defect production releases.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management app using Ruby on Rails MVC with responsive SCSS and frontend logic.
- Implemented dynamic CRUD operations, authentication, caching, and database validation for secure handling.
- Optimized SQL queries, modular code, and testing workflows to improve maintainability and performance efficiency.
- Ensured clean, scalable architecture with accessibility compliance and future feature expansion readiness.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based backend analytics platform generating automated financial insights and daily reports efficiently.
- Built structured ETL workflows using Python, SQL, and PHP scripts to validate and preprocess large-scale datasets reliably.
- Implemented REST API testing automation and unit testing using PHPUnit to ensure consistent, error-free backend results.
- Integrated Docker CI/CD pipelines to enhance system availability, deployment speed, and response times significantly.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based ensemble deep learning pipeline achieving 92% accuracy in driver fatigue detection.
- Improved preprocessing efficiency using feature extraction optimization, reducing computation time by 20%.
- Applied structured experimentation, hyperparameter tuning, and reproducible workflows for consistent validation results.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including loops, functions, control flow, and object-oriented programming concepts.
- Applied machine learning algorithms, feature engineering, preprocessing, and model evaluation on real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures, prompt engineering, and Large Language Model principles for AI workflows.
- Built generative AI applications for text generation, summarization, PHP backend, and automation workflows.
