EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, Java, JavaScript, SQL, Golang (basic)
- **Operating Systems**: Linux, Red Hat Enterprise Linux (RHEL)
- **Containers**: Docker, Kubernetes, OpenShift
- **Configuration Management**: Ansible
- **Version Control**: Git, GitHub
- **APIs**: REST APIs, API Integration
- **Cloud Platforms**: AWS, Google Cloud Platform, Microsoft Azure
- **Data Processing**: ETL Pipelines, Data Integration, Data Validation, JSON, XML
- **Artificial Intelligence**: Generative AI, Large Language Models, PyTorch
- **Development Practices**: Agile, Software Development Life Cycle, Debugging, Feature Development, Issue Tracking
- **Soft Skills**: Problem Solving, Analytical Thinking, Cross Functional Collaboration, Communication, Continuous Learning

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines on Linux processing 50,000+ records improving automation reliability.
- Engineered SQL schemas, indexing strategies, and JSON pipelines reducing query latency by 35% across cloud.
- Developed automated debugging and validation scripts for REST APIs ensuring reliable feature development integration.
- Collaborated with cross-functional Agile teams deploying scalable enterprise integrations across distributed cloud platforms.
- Implemented GitHub CI/CD pipelines with Docker containers improving deployment stability and monitoring.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed scalable backend recommendation engine using Python, SQL, REST APIs enabling product discovery.
- Integrated Large Language Models improving contextual recommendations, semantic search, and decision intelligence.
- Implemented Docker containers and CI/CD pipelines enabling faster feature development and scalable cloud infrastructure.
- Designed modular API testing frameworks ensuring automated validation, debugging, issue tracking, and stable releases.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC architecture supporting scalability.
- Implemented CRUD operations, database validation, and caching improving backend performance and maintainability.
- Optimized SQL queries and backend logic improving response time and application scalability for over 1,000 active users.
- Ensured modular architecture aligned with Agile SDLC practices enabling faster debugging and maintainable deployments.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud analytics platform on Google Cloud using Python pipelines and containerized Docker workflows.
- Built structured ETL workflows using Python, SQL, JSON enabling reliable data integration and processing.
- Implemented REST API testing frameworks ensuring 98% data accuracy across automated financial insights generation.
- Integrated Docker containers with CI/CD pipelines improving deployment speed, availability, and monitoring.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch ensemble deep learning pipeline enabling real-time driver fatigue detection achieving 92% accuracy.
- Optimized preprocessing and feature extraction workflows reducing computational overhead by 20%.
- Applied structured experimentation, hyperparameter tuning, and reproducible ML pipelines ensuring reliable evaluation.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including OOP, automation scripting, and scalable backend development.
- Applied machine learning algorithms and feature engineering improving predictive model accuracy across datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures, prompt engineering techniques, and principles behind modern Large Language Models.
- Built generative AI applications for document summarization, search automation, and intelligent workflow optimization.
