EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Java, Python, C/C++, Object-Oriented Programming (OOP), Data Structures, Algorithms
- **Backend**: Backend Development, REST APIs, Microservices Architecture, System Design
- **Cloud**: AWS, Cloud Infrastructure, Distributed Systems, Scalable Systems, Platform Architecture
- **DevOps**: Docker, Kubernetes, Containerization, CI/CD Pipelines, Monitoring, Linux/Unix
- **Databases**: SQL, Relational Databases, Query Optimization
- **Software Engineering**: Agile, SDLC, Test-Driven Development (TDD), Unit Testing
- **Tools**: Git, GitHub, Postman
- **Core Skills**: Problem Solving, Analytical Thinking, Cross-Functional Collaboration, Communication

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python and Java backend pipelines processing 50,000+ records improving distributed system reliability.
- Engineered scalable SQL schemas reducing query latency improving backend platform performance significantly.
- Developed automated validation scripts ensuring data integrity across distributed backend workflows reliably.
- Collaborated cross-functionally deploying scalable backend services on AWS following Agile SDLC DevOps practices.
- Implemented Docker, Kubernetes, structured logging, CI/CD pipelines enabling monitoring and scalable cloud deployments.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed scalable backend recommender using Python, SQL, REST APIs following object-oriented design principles.
- Integrated Large Language Models improving contextual intelligence, automation workflows, and recommendation accuracy.
- Implemented Docker containerization and CI/CD pipelines enabling reliable deployments and scalable cloud infrastructure.
- Designed modular API testing frameworks and monitoring metrics ensuring reliable backend services and scalability.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC architecture and REST APIs.
- Implemented authentication workflows, CRUD operations, and caching improving backend account security and reliability.
- Optimized database queries and modular architecture improving application scalability, maintainability, and performance.
- Ensured scalable architecture and modular object-oriented code improving backend platform maintainability.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based backend analytics platform generating automated financial insights through scalable Python services.
- Built structured ETL workflows using Python and SQL processing datasets efficiently ensuring reliable validation.
- Implemented REST API automation testing and monitoring frameworks improving backend reliability and analytics accuracy.
- Integrated Docker containerization and CI/CD pipelines improving AWS cloud deployment efficiency and scalability.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch ensemble deep learning pipeline achieving high accuracy for driver fatigue detection tasks.
- Improved preprocessing efficiency using optimized feature extraction reducing computation cost and training time.
- Applied hyperparameter tuning and reproducible workflows ensuring consistent machine learning model performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including algorithms, functions, loops, and object-oriented programming concepts.
- Applied machine learning algorithms, feature engineering, and evaluation techniques on real-world datasets successfully.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures, prompt engineering, and scalable generative AI systems using modern frameworks.
- Built generative AI applications enabling automation, text generation, summarization, and intelligent workflows.
