EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, Java, SQL
- **APIs**: REST, SOAP
- **Integration**: Workday, Enterprise, RAAS
- **Data**: ETL, Integration, Preprocessing, Validation
- **Artificial Intelligence**: GenAI, AI Automation, LLMs
- **Cloud & DevOps**: AWS, GCP, Azure, Git, Docker, CI/CD
- **Enterprise Systems**: HCM, ERP
- **Platforms**: Workday, ServiceNow
- **Methodologies**: Agile, SDLC
- **Operations**: Monitoring, Troubleshooting, Automation
- **Soft Skills**: Analytical Thinking, Problem-Solving, Collaboration, Communication

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines processing 50,000+ records, improving integration reliability and automation.
- Engineered SQL schemas, indexing strategies, and JSON and XML datasets reducing query latency across cloud.
- Developed automated monitoring and validation scripts for REST API integrations ensuring workflow reliability.
- Collaborated cross-functionally implementing AWS cloud enterprise integrations for HCM systems and workflows using Agile.
- Implemented CI/CD pipelines, structured logging, and automation monitoring improving production stability and uptime.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed backend recommender platform using Python, SQL, REST APIs for AI-powered recommendations.
- Integrated Large Language Models enabling AI automation, semantic search, and recommendation accuracy improvement.
- Built containerized Docker CI/CD pipelines ensuring reliable cloud deployment and faster model release cycles.
- Designed modular API validation and monitoring frameworks improving integration reliability and production performance.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management system using Ruby on Rails MVC supporting 1,000+ users.
- Implemented authentication, CRUD workflows, caching, and database validation ensuring secure application integrations.
- Optimized SQL queries and caching strategies improving backend response times and application scalability.
- Ensured maintainable modular architecture aligned with Agile SDLC practices for faster feature delivery.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud analytics platform on GCP generating automated financial insights and dashboards daily.
- Built structured ETL pipelines using Python, SQL, JSON enabling reliable data integration workflows.
- Implemented REST API testing frameworks ensuring accurate data processing and 98% model output reliability.
- Integrated Docker CI/CD pipelines improving system availability, deployment speed, and operational monitoring efficiently.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch deep learning ensemble pipeline enabling real-time AI detection achieving 92% accuracy.
- Optimized feature extraction and preprocessing, reducing computation overhead and improving scalable ML performance.
- Applied hyperparameter tuning and structured experimentation ensuring reproducible AI workflows and evaluation.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python programming with object-oriented design, automation scripting, and scalable data processing.
- Applied machine learning algorithms, feature engineering, and evaluation improving predictive accuracy across datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and generative AI concepts enabling intelligent automation workflows.
- Built generative AI tools for document parsing, summarization, and search automation reducing manual effort.
