EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, SQL, R
- **Data**: Data Processing, Data Transformation, Data Validation, Large Dataset Analysis, Data Modeling
- **Analytics**: Data Analytics, Statistical Analysis, Trend Analysis, Correlation Analysis, Business Insights, Value Quantification
- **Machine Learning**: Machine Learning Algorithms, Feature Engineering, Model Evaluation, Inference Workflows
- **Business Intelligence**: Dashboard Development, Data Visualization, Analytical Reporting, Business Intelligence
- **Databases**: Relational Databases, PostgreSQL, SQL Query Optimization, Indexing Strategies
- **Data Engineering**: ETL Pipelines, Data Pipelines, Workflow Automation, Scalable Data Processing
- **Tools**: Advanced Excel (Pivot Tables, Data Analysis, ROI Calculations), Tableau, Power BI
- **Development**: REST APIs, Git Version Control, CI/CD Pipelines, Docker
- **Collaboration**: Cross-Functional Collaboration, Stakeholder Communication, Problem Solving, Analytical Reasoning, Agile Development, SDLC

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python and SQL ETL pipelines processing 50,000+ records, improving analytics reliability and business insights.
- Engineered relational database schemas and indexing strategies, reducing query latency enabling faster dataset analysis.
- Developed automated data validation workflows producing structured datasets for machine learning statistical analysis.
- Collaborated with cross-functional teams delivering analytics solutions, business intelligence dashboards and value insights.
- Implemented Docker CI/CD pipelines ensuring reliable deployments, optimizing analytics performance and insights.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed Python SQL recommender system applying machine learning algorithms generating recommendations.
- Integrated Large Language Models enabling AI-driven analytics insights improving contextual recommendation accuracy.
- Designed scalable ETL data pipelines and REST APIs supporting machine learning inference analytics workflows.
- Implemented Docker-based CI/CD pipelines improving deployment reliability analytics scalability and backend performance.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management platform using Ruby on Rails MVC and relational database management systems.
- Implemented CRUD APIs, authentication workflows, and structured data models supporting scalable application architecture.
- Optimized SQL queries and indexing strategies improving database performance and response latency services.
- Ensured modular architecture using Git version control Agile development practices and maintainable software design.

Morning Market Brief | LINK — **June 24- August 2024**

- Performed experimentation, statistical analysis and hyperparameter tuning ensuring reproducible machine learning results.
- Built structured data pipelines transforming financial datasets into validated signals supporting analytics and business insights.
- Implemented REST API automation testing and validation ensuring reliable data ingestion and accurate analytical outputs.
- Integrated Docker containers and CI/CD pipelines improving deployment efficiency, system scalability, and analytics reliability.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch deep learning pipeline applying machine learning models for real-time driver fatigue detection.
- Optimized preprocessing pipelines and feature extraction algorithms reducing model inference latency by twenty percent.
- Performed experimentation, statistical evaluation and hyperparameter tuning ensuring reproducible learning performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python programming including data structures algorithms control flow and object-oriented programming concepts.
- Applied machine learning algorithms feature engineering techniques and statistical evaluation metrics real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architectures embeddings prompt engineering and advanced analytics principles behind modern AI.
- Developed generative AI applications enabling semantic search automated summarization and intelligent analytics workflows.
