EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python
- **Frontend**: HTML Fundamentals, SCSS, Website Content Structuring
- **Web**: Website Structure Optimization, Content Optimization, Meta Tags Optimization, URL Optimization
- **Data**: SQL, Data Analysis, Data Validation
- **DevOps**: Git
- **Methodologies**: Search Engine Optimization (SEO), On-Page SEO, Off-Page SEO, Keyword Research, Link Building, SEO Auditing, Google Search Console, Google Analytics (GA4), Website Traffic Analysis, Keyword Ranking Tracking, SEO Performance Monitoring, SEO Reporting, Analytical Thinking, Problem Solving, Communication, Team Collaboration

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines analyzing 50,000+ records daily enabling scalable insights supporting SEO analytics.
- Engineered SQL schemas and indexing strategies improving dataset retrieval speed for website traffic analysis.
- Developed automated validation scripts ensuring reliable datasets used for SEO monitoring and ranking analysis.
- Collaborated with cross-functional teams delivering scalable analytics infrastructure aligned with Agile marketing workflows.
- Implemented structured logging and Docker CI/CD pipelines ensuring reliable data processing and reporting automation.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable recommendation backend using Python, SQL, and REST APIs supporting intelligent content discovery.
- Integrated Large Language Models enhancing content relevance, improving search intent alignment and optimization.
- Implemented CRUD operations, authentication systems, and database validation ensuring reliable backend architecture.
- Designed modular testing workflows validating APIs and datasets ensuring accurate analytics outputs supporting optimization.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack web application using Ruby on Rails MVC with responsive SCSS interface.
- Implemented Docker-based CI/CD pipelines improving deployment reliability and analytics infrastructure monitoring.
- Optimized database queries and caching improving response performance enabling efficient page delivery experience.
- Ensured scalable architecture, accessibility compliance, and clean modular UI supporting SEO-friendly website structure.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based analytics platform generating automated reports supporting financial insights and monitoring systems.
- Built structured ETL workflows using Python and SQL enabling efficient dataset processing.
- Implemented REST API automation testing ensuring reliable data pipelines supporting dashboards and analytics accuracy.
- Integrated Docker CI/CD pipelines improving system availability enabling consistent deployment environments for analytics.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch ensemble deep learning pipeline achieving high accuracy for driver fatigue detection.
- Improved preprocessing efficiency using optimized feature extraction pipelines reducing computation time twenty percent.
- Applied structured experimentation and hyperparameter tuning ensuring consistent machine learning performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python programming including loops, functions, object-oriented programming, and data manipulation techniques.
- Applied machine learning algorithms, feature engineering methods, and evaluation techniques to analytical datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and Large Language Model fundamentals for automation.
- Built practical generative AI systems enabling automated text generation, summarization pipelines, and workflow automation.
