EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, SQL, Object-Oriented Programming (OOP)
- **Machine Learning**: Machine Learning, Predictive Modeling, Feature Engineering, Model Evaluation, Deep Learning
- **Data**: Data Cleaning, Data Preprocessing, Data Analysis, Data Pipelines, ETL
- **Python Libraries**: Pandas, NumPy, Scikit-learn, PyTorch
- **Visualization**: Data Visualization, Matplotlib, Power BI, Tableau
- **Tools**: Jupyter Notebook, Git, Docker, Machine Learning Pipelines
- **Cloud**: AWS, Microsoft Azure
- **Engineering**: REST APIs, API Integration, Workflow Automation
- **Statistics**: Statistical Analysis, Probability, Hypothesis Testing
- **Soft Skills**: Analytical Thinking, Problem Solving, Cross-Functional Collaboration, Communication

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python data pipelines processing 50,000+ records using preprocessing, validation, statistical analysis workflows.
- Engineered SQL schema optimizations and indexing strategies improving query performance and data processing.
- Developed automated Python scripts using Pandas and NumPy supporting feature engineering and dataset validation.
- Collaborated with cross-functional teams translating requirements into scalable data solutions supporting machine learning.
- Implemented Git-based CI/CD pipelines and AWS deployments ensuring reproducible analytics environments.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed machine learning recommender system using Python, Pandas, SQL, and Scikit-learn for personalization.
- Applied feature engineering, preprocessing, statistical analysis improving recommendation relevance across datasets.
- Integrated Large Language Models with Python pipelines enhancing contextual intelligence and recommendation automation.
- Implemented Docker CI/CD pipelines and Git version control enabling scalable deployment and monitoring.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC architecture with responsive interface.
- Implemented CRUD APIs, authentication systems, caching mechanisms, and SQL database operations ensuring security.
- Optimized backend queries and structured testing pipelines improving application performance, reliability, and maintainability.
- Ensured scalable architecture using modular development practices supporting collaboration and efficient software delivery.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based data analytics platform generating automated financial insights using Python pipelines and SQL.
- Built structured ETL pipelines performing data cleaning, preprocessing, and statistical analysis across financial datasets.
- Implemented REST API integrations and automated validation scripts ensuring accurate ingestion and reporting outputs.
- Integrated Docker CI/CD workflows enabling automated deployment and improved system stability significantly.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch deep learning ensemble model for predictive fatigue detection across real-world driving datasets.
- Applied feature extraction, preprocessing, and hyperparameter tuning improving model efficiency and prediction accuracy.
- Conducted structured experimentation and evaluation workflows ensuring reproducible machine learning research results.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Developed Python expertise including Pandas, NumPy, preprocessing workflows, and machine learning fundamentals.
- Applied feature engineering, statistical analysis, and model evaluation techniques across real-world datasets successfully.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and foundational principles behind modern Large Language Models.
- Built generative AI applications supporting text generation, summarization, and intelligent automation workflows.
