EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science & Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, JavaScript, TypeScript
- **Machine Learning**: Supervised Learning, Unsupervised Learning, Neural Networks, Model Evaluation, Hyperparameter Tuning
- **Deep Learning**: PyTorch, TensorFlow, Scikit-learn, Predictive Modeling
- **NLP**: Hugging Face Transformers, spaCy, Text Preprocessing, Tokenization
- **Data**: Pandas, NumPy, ETL Workflows, Data Cleaning, Data Preprocessing, Feature Engineering, Large Dataset Handling
- **Analytics**: Predictive Analytics, Model Performance Metrics, Experimentation
- **Cloud**: AWS SageMaker, Google Vertex AI, Azure AI
- **Deployment**: REST APIs, Docker, CI/CD Pipelines, SDLC, DevOps Practices
- **Collaboration**: Agile, Cross-Functional Teamwork, Problem Solving, Ownership-Driven Development
- **AI Ethics**: Bias Detection, Model Interpretability

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python and ML pipelines processing 50,000+ daily records, improving reliability 30%.
- Engineered SQL schemas and indexing strategies, reducing latency and enhancing backend performance.
- Developed automated validation and feature engineering scripts ensuring data integrity across workflows.
- Collaborated with cross-functional teams to deploy scalable, cloud-ready solutions using SDLC and DevOps.
- Implemented structured logging and Docker CI/CD pipelines, ensuring stable production deployments and monitoring.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable backend recommender system using Python, SQL, and REST APIs for personalized recommendations.
- Integrated NLP frameworks and LLMs, improving contextual intelligence, predictive analytics, and recommendation accuracy.
- Implemented Docker-based CI/CD pipelines improving response times, deployment efficiency, and production reliability.
- Designed modular API testing scripts and validation checks for consistent, reliable production releases.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management app using Ruby on Rails MVC with responsive SCSS UI.
- Implemented dynamic CRUD operations, authentication, caching, and database validation processes.
- Optimized query performance and maintainability through structured testing and modular code practices.
- Ensured scalability, accessibility compliance, and clean, modular architecture across the application.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based backend analytics platform generating automated financial insights daily.
- Built structured ETL and data preprocessing workflows using Python and SQL for large datasets.
- Implemented REST API automation testing and validation strategies ensuring accurate results.
- Integrated Docker CI/CD pipelines, improving response time and system availability significantly.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based ensemble deep learning pipeline achieving high accuracy for fatigue detection.
- Improved preprocessing efficiency using optimized feature extraction techniques, reducing computation time 20%.
- Experimented, tuned, and validated ML models with feature engineering for consistent performance.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals, OOP concepts, loops, functions, and control flow.
- Applied ML algorithms, feature engineering, and model evaluation on real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and principles of Large Language Models.
- Built generative AI applications for text generation, summarization, and automation workflows.
