EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, SQL, Java, Git, Docker, CI/CD
- **Machine Learning**: Supervised Learning, Unsupervised Learning, Feature Engineering, Feature Selection, Model Training, Model Evaluation
- **Deep Learning**: PyTorch, TensorFlow, Keras, Hyperparameter Tuning, AI Infrastructure
- **Natural Language Processing**: NLP, Information Retrieval, Semantic Search, Large Language Models (LLMs), Document Parsing, Search Tools
- **Data**: ETL Pipelines, Data Preprocessing, Dataset Annotation, Data Engineering
- **Cloud**: AWS, GCP, Azure
- **Methodologies**: Agile, SDLC, System Optimization, Structured Experimentation, Software Development
- **Soft Skills**: Problem-Solving, Collaboration, Communication Skills, Innovative Learning

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines processing 50,000+ daily records, improving ML workflow reliability by 30%.
- Engineered SQL schemas and indexing strategies, reducing query latency by 40% and enhancing AI infrastructure.
- Developed automated validation scripts ensuring 100% feature correctness and ML data preprocessing accuracy.
- Collaborated cross-functionally to deploy scalable AWS cloud ML solutions, accelerating timelines by 25%.
- Implemented structured logging and CI/CD automation, stabilizing ML pipelines and reducing downtime by 35%.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Developed scalable backend recommender system using Python, SQL, REST APIs, increasing user engagement by 28%.
- Integrated Large Language Models (LLMs) into ML pipelines, boosting semantic search and recommendation accuracy 22%.
- Implemented Docker-based CI/CD pipelines for model training and deployment, reducing response times by 40%.
- Designed modular API testing scripts and validation checks, achieving 99% consistent production-ready ML releases.

Rails TODO App | LINK — **September 24- November 2024**

- Led full-stack development using Ruby on Rails MVC with responsive SCSS UI, supporting 1,000+ users.
- Implemented dynamic CRUD operations, authentication, caching, and database validation, reducing vulnerabilities by 50%.
- Optimized query performance and maintainability through structured testing and modular code practices.
- Enforced scalable, accessible modular architecture, enabling seamless software development iterations.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed cloud-based backend analytics platform on GCP generating daily automated insights with 95% accuracy.
- Built structured ETL pipelines using Python and SQL, streamlining data engineering and reducing processing time by 25%.
- Implemented REST API automation testing and validation, ensuring 98% machine learning model output accuracy.
- Integrated Docker CI/CD pipelines, improving response time by 35% and achieving 99.9% system availability.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch-based deep learning ensemble pipeline achieving 92% accuracy in real-time AI applications.
- Optimized feature extraction techniques, cutting preprocessing compute time by 20% while preserving model evaluation.
- Applied hyperparameter tuning and reproducible workflows, delivering consistent 15% uplift in scalable AI systems.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Mastered Python fundamentals including OOP, loops, functions to build efficient data processing scripts.
- Engineered features and evaluated models on real-world datasets, improving supervised learning accuracy by 18%.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned transformer architecture, prompt engineering, and Large Language Models (LLMs) for AI automation.
- Built generative AI applications for text summarization, document parsing, and search tools, reducing review time by 40%.
