EDUCATION

Lovely Professional University Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, Java, C++, Object-Oriented Programming, Data Structures, Algorithms
- **Software Engineering**: Software Development Life Cycle (SDLC), Software Development, Software Design, System Design, Agile Development
- **Backend**: REST APIs, Microservices Architecture, Backend Development, Scalable Systems
- **Data**: SQL, MySQL, Data Pipelines, ETL, Data Processing
- **Cloud**: AWS, Distributed Systems, Cloud Deployment
- **DevOps**: Docker, Kubernetes, CI/CD, Linux
- **Tools**: Git, GitHub, Postman, API Testing, Debugging, Version Control
- **Core**: Problem Solving, Analytical Thinking, Critical Thinking, Attention to Detail, Collaboration

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK **June 25- August 25**

- Optimized Python data pipelines processing 50,000+ candidate records daily improving distributed system reliability.
- Engineered MySQL indexing and schema improvements reducing query latency enhancing backend system scalability.
- Developed ETL pipelines generating embeddings supporting semantic search, analytics, and recommendation services.
- Collaborated with cross-functional teams deploying cloud backend services on AWS following Agile SDLC.
- Implemented Docker containerization, Kubernetes orchestration, and CI/CD pipelines ensuring reliable deployments.

PROJECTS

Generative AI Product Recommender System | LINK **June 25- August 2025**

- Developed scalable backend recommender system using Python SQL REST APIs enabling personalized discovery.
- Integrated Large Language Models generating embeddings enabling semantic search and recommendation systems.
- Implemented Docker-based CI/CD pipelines improving deployment efficiency backend reliability and system performance.
- Designed modular API testing frameworks and monitoring metrics ensuring reliable releases and backend services.

Rails TODO App | LINK **September 24- November 2024**

- Developed full-stack task management platform using Ruby on Rails MVC architecture delivering backend services.
- Implemented authentication workflows CRUD operations Redis caching and SQL validation ensuring reliable functionality.
- Optimized database queries and indexing strategies improving backend performance scalability and maintainability.
- Ensured modular object-oriented architecture following SDLC principles improving system reliability and maintainability.

Morning Market Brief | LINK **June 24- August 2024**

- Developed cloud backend platform generating automated financial insights using scalable Python microservices APIs.
- Built structured ETL pipelines using Python and SQL processing datasets enabling reliable ingestion.
- Implemented REST API testing automation and validation workflows improving backend reliability and accuracy.
- Integrated Docker CI/CD pipelines improving deployment efficiency backend availability and system scalability.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed PyTorch ensemble deep learning pipeline achieving high accuracy for driver fatigue detection.
- Optimized preprocessing pipeline using advanced feature extraction techniques reducing computation cost training time.
- Applied experimentation, hyperparameter tuning, and reproducible machine learning workflows ensuring consistent results.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE **August 2024**

- Mastered Python fundamentals including algorithms, data structures, loops, functions, and object-oriented programming.
- Applied machine learning algorithms feature engineering techniques and model evaluation on real-world datasets.

Generative AI with LLMs (Coursera) | CERTIFICATE **March 2024**

- Learned transformer architecture prompt engineering techniques and foundational principles of Large Language Models.
- Developed generative AI applications enabling automation, text generation, summarization, and recommendation workflows.
