EDUCATION

Lovely Professional University — Jalandhar, India
Bachelor of Technology (Computer Science and Engineering) — **July 2022 - May 2026**

SKILLS SUMMARY

- **Programming**: Python, Java
- **Quality Assurance**: Manual Testing, Regression Testing, Smoke Testing, Exploratory Testing, Test Case Execution, Usability Testing, UX Testing
- **Application Testing**: UI Testing, User Experience (UX) Validation, Workflow Testing, Cross-Device Testing
- **Bug Tracking**: Bug Reporting, Defect Identification, Reproduction Steps Documentation, Issue Validation
- **API Testing**: Postman, REST API Testing, Request/Response Validation, Endpoint Verification
- **Database Validation**: SQL, MySQL, Data Integrity Verification
- **Tools**: Git, Version Control Systems, CI/CD Pipelines, Jira, ClickUp
- **Software Engineering**: Software Development Life Cycle (SDLC), Release Validation
- **Debugging**: Troubleshooting, Root Cause Analysis, Error Identification
- **Methodologies**: Agile Development

WORK EXPERIENCE

DATA ENGINEER INTERN | flickDONE | LINK — **June 25- August 25**

- Optimized Python ETL pipelines processing 50,000+ records daily identifying inconsistencies improving data reliability.
- Executed validation checks and exploratory testing on backend workflows detecting edge-case failures.
- Performed API testing using Postman and SQL queries to verify integrations, ensuring accurate data flow.
- Collaborated with engineering and QA teams documenting defects, reproducing issues, and validating fixes carefully.
- Implemented CI/CD automation and structured logging to support release validation and maintain stable deployments.

PROJECTS

Generative AI Product Recommender System | LINK — **June 25- August 2025**

- Built scalable recommendation backend using Java SQL and REST APIs supporting structured validation processes.
- Executed API testing using Postman for endpoint validation detecting integration issues ensuring reliable communication.
- Performed regression testing on recommendation workflows identifying edge-case failures improving system stability.
- Implemented Docker-based CI/CD pipelines supporting release validation and consistent production deployments.

Rails TODO App | LINK — **September 24- November 2024**

- Developed full-stack task management application using Ruby on Rails MVC implementing structured CRUD workflows.
- Performed manual UI testing validating user navigation, responsiveness, and usability across application features.
- Identified UI inconsistencies and functional defects through exploratory testing improving application usability and stability.
- Ensured structured database validation and reliable workflows through debugging and systematic problem identification.

Morning Market Brief | LINK — **June 24- August 2024**

- Developed backend analytics system generating automated financial insights using Java APIs and structured ETL workflows.
- Performed data validation and SQL-based verification ensuring accuracy of analytics outputs and pipeline results.
- Executed API testing and regression validation ensuring reliable system integrations and consistent output across releases.
- Implemented Docker-based CI/CD workflows supporting release testing and stable cloud deployment operations.

RESEARCH AND PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition | IEEE, 2025

- Developed Python deep learning pipeline improving driver fatigue detection accuracy using structured model validation.
- Optimized data preprocessing workflows reducing computational overhead and improving reliability of experimental results.
- Applied systematic experimentation, debugging, and validation techniques ensuring reproducible research outcomes.
- Prepared technical documentation describing architecture, methodology, testing procedures, and implementation workflows.

CERTIFICATES

Python, Data Science & ML (Cipherschools) | CERTIFICATE — **August 2024**

- Developed strong Python programming skills including debugging, data validation, and structured problem-solving workflows.
- Applied machine learning pipelines and dataset validation techniques ensuring reliable results across experimental projects.

Generative AI with LLMs (Coursera) | CERTIFICATE — **March 2024**

- Learned REST API integrations, automation workflows, and scalable backend architecture for AI applications.
- Built generative AI pipelines integrating APIs and automated systems supporting efficient development workflows.
